

From mxd.dk: Flot international ros for Danish Metal Awards- og forudgående netværks-
møde

Albumaktuelle Mnemic spillede til DMeA, der får fine ord med på vejen af den internationale branche. (Foto: Jakob Dinesen).

- I had a blast with you, all the Danish people and all other colleagues as well. Hope you can continue your fantastic work there and looking forward to keep in touch and hopefully see you latest next year.

Ordene kommer fra Christian Klimek fra metalscenens vel nok største pladeselskab, Roadrunner Records, og det, Christian Klimek taler om, er det nyligt afviklede DMeA - Danish Metal Awards og det branchemøde, der blev afviklet umiddelbart før uddelingen af priserne.

Branchemødet var arrangeret af DMeA, MXD og ROSA og havde netop til hensigt at styrke det dansk-internationale samarbejde i metalverdenen. Og det lykkede tilsyneladende, for flere af de fremtrædende personer fra branchen, som deltog både i sammenkomsten og til selve prisuddelingen, udtrykker stor tilfredshed med begge dele.

Alexander Milas, Editor - Metal Hammer (et af verdens største metalmagasiner):

- The Danish Metal Awards are an expertly run, first class affair that the metal world needs to take notice of. With a tradition of recognizing Denmark's burgeoning metal scene, it's the ideal platform to introduce upcoming and established artists to the world stage.

Nima Dervish, Closeup Magazine:

-Thanks for a great time. I had a blast and also got to discover some Danish bands I didn't

Wenke Gillner, Lifeforce Records:

- We, Lifeforce Records, would like to express our appreciation for your incredible work to establish such a fabulous event. I believe the DMeA was a big success and hope that you will be able to continue doing it! A lot of other countries should take this event as an example of an excellent contribution to the Metal World.

Maria van der Lee, Editor of Slavestate Magazine (Sveriges største metal webzine):

- My first encounter with the Danish Metal Awards has been an extremely rewarding experience. The entire event was very well planned and executed, with a professional attitude and commitment seen far too seldom in any cultural area outside the officially sanctioned sphere. The high level of ambition illustrates the potential of the Danish metal scene, which has seen a rapid growth in both quantity and quality in the last ten years and is without doubt ready to be both heard and seen outside the borders of Denmark.
