20-year-old **Alexander Oscar** is a Danish singer and songwriter signed to Sony Music Denmark. With only a few singles released, he has already proven himself a true pop star on the rise. He is an extremely talented vocalist and songwriter and has formed his own, unique universe of smooth and immensely catchy pop songs.

Although at an early stage in his career, he has already been working with prominent producers who've notched up hits with Mark Ronson, Zara Larsson, Mary J. Blige, Ellie Goulding and ALMA.

Since the release of the hit single 'Number' in February 2018, Alexander Oscar has made a mark for himself in the Danish music scene. He was named "The Next Big Danish Artist" by Danish Broadcasting Corporation as well as by other influential national media. Alexander has performed on several national television shows (among others, Denmark's Got Talent), received a Gold Plaque, topped the Danish airplay charts with three singles and had his singles streamed more than 20 million times.

Alexander Oscar has quickly gained international interest as well. Apple Music's Beats1 has recently played the single 'Question Mark' on the prime time show with Broke Reese. He has signed an international publishing deal with Sony/ATV and is being pushed by Epic Records in Germany and Columbia Records in France. In 2019, he will perform at several international showcases and play his first headline shows in Denmark.

On January 11th, Alexander Oscar released his latest single 'Complicated' with Swedish singer SVEA which was followed by his debut album *Highs & Lows* on January 18th.

Ragna Kjartansdóttir also known as **Cell7**, is a Filipino-Icelandic rapper, songwriter and sound engineer. She released her first solo album *Cellf* in 2013. The album received outstanding reviews and was mentioned on most national lists for the best Icelandic albums of the year 2013. Moreover, the album received the Kraumur Music Award, chosen by a diverse panel of experienced Icelandic music and radio journalists.

Her first music video 'City Lights' was released in 2017, showcasing the first single to appear from her forthcoming album. The track was nominated as one of the best rap songs that same year at the Icelandic Music Awards. Her second single 'Peachy' will be released on Feb 8th, and sets a new tone - a much brighter, soulful, updated approach to the hip hop genre since it has evolved significantly throughout the years. Her album *Is Anybody Listening* is due to be released on February 18th, and is an extensive LP that takes you in various directions, from confessions of defeat to being in control. Whatever the topic may be, this album suggests she's built to last.

Stepping into the limelight in 2017, **Linn Koch-Emmery** has been stated as one of the most rapid rising stars in modern indie rock. With a guitar driven sound described as both speaker breaking yet catchy, she has built a reputation of providing melodies so sharp they bury their way into your head for weeks. Since the release of her debut EP *Boys* last fall, she has been praised in press and media all over the world, picked up by influential radio stations such as KCRW, KROQ and highlighted in her native Sweden's biggest radio and press SR P3, Dagens Nyheter and Aftonbladet as well as being listed on a number of major playlists. Following the debut, Koch-Emmery went on her first European tour supporting Swedish band Johnossi as well as opening for Pussy Riot, completing her first own Swedish tour and playing in Mexico and the United States.

Now she is back with her second EP *Waves*, released in November and featuring the two singles 'Wires' and 'Don't sleep on my luv', both released in 2018.

"What a discovery: The Swedish Linn Koch-Emmery has an outstanding sense for balance. Wires, a single from the upcoming second EP, blends the borders between thoughtfulness, striking indie-rock and catchy pop. Absolutely intense." - Negative White

Linn Koch-Emmery on *Waves*: *"To me, "Waves" feels like pulling the saturations button up a bit. It contains that spark and energy that feels typical for me, but theres also brighter undertones of nostalgia and melancholia as well. As long as I remember I have been referring to my mood switches as waves between high and low. The title is taken from a line of the last track on the EP that I found myself have circulating in my head a lot when I was feeling busy yet very bored."*
